DP31 / PR31

DP31 / PR31 is our specialized line of anti-gassing powder coatings based **Ag-kote™** technology, developed and patented by **Protech-Oxyplast** Group.

DP31 / PR31 features unique formulation that enable coating porous substrates with minimal craters or air bubbles at lower curing temperatures, saving energy and costs. With exceptional chemical resistance, stain resistance, and weather resistance, Daiphu Protech-Oxyplast guarantees that **DP31 / PR31** is an ideal coating solution for its remarkable performance and durable properties.

HOW DOES IT WORK?

Inherent porosity of certain substrates such as galvanized steel, cast iron, and aluminum poses a challenge during the curing process as trapped gasses escape through the coating layer, resulting in unsightly blisters and expose the risk of corrosion.

Developed using the **Ag-kote™** technology, our **DP31 / PR31** series offers durable solutions to prevent blistering and create smooth protective coatings.

MAIN FEATURES & ADVANTAGES

Versatile application for both interior and exterior usage

Lower curing temperature which reduces energy and costs associated

Allows coating porous surfaces like galvanized steel, cast iron, or aluminum while minimizing gas bubble formation

Optimizes corrosion resistance and UV protection

Excellent chemical resistance and withstands harsh weather conditions

Can be combined with other coating features to achieve satisfaction in both aesthetics and product application

TYPICAL APPLICATIONS

Household and office appliances, gas tanks, furniture, tools and hardware

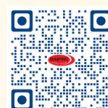

Industrial and heavy duty equipment, street furniture, steel constructions

CARING & MAINTENANCE

Daiphu Protech-Oxyplast highly recommends storing your **DP31 / PR31** products in a temperature-regulated area. Please consult our maintenance and after care guidance sheet for proper storage and cleaning.

COLORS & SURFACE OPTIONS

Daiphu Protech-Oxyplast provides a wide range of readily available stock colors and surface options for customers to choose from. Please take a look at our color chart and get inspired from a broad range of extraordinary options. We also offer customized formulations to match your interests. Please contact our coating expert for further consultation and discussion.
